

**POZOR:**

Za priklop energijskega stikala je potrebno odstraniti ohišja konektorjev, vodnike pa priklopiti glede na številke kontaktov. Staro in novo stikalo imata enake številke. Novo stikalo ima samo en kontakt za S1 in S2. V primeru, da je na starem stikalu priklopljena še signalna lučka, jo je potrebno prestaviti na kontakt na sosednjem stikalu.

**ATTENTION:**

For connection of the new energy switch it is necessary to remove connector housings, wires must be connected according to the numbers of contacts. Old and new switch have the same numbers. New switch has only one contact for S1 and S2. In case that on the old switch is connected also signal lamp it is necessary to connect the lamp to the contact on the nearest switch.
